Teylers Museum Online Catalog: Systematic Quality Analysis

Version: 20260307 **Date:** 7 March 2026 **Researcher:** Joost Soeterbroek, assisted by AI research agent (Claude Opus 4.6, Anthropic) **Contact:** Joost Soeterbroek — joost.soeterbroek@gmail.com — +31 6 34 83 38 45 **Repository:** https://github.com/jsoeterbroek/teylers_collection_research

---

Management Summary

An AI-assisted analysis of **35 randomly selected objects** from Teylers Museum's online catalog (https://teylers.adlibhosting.com) has identified **60 major errors** and over **150 minor omissions**. Not a single object was found to be free of errors or significant omissions.

The objects span the museum's full breadth: prints, drawings, medals, coins, fossils, scientific instruments, and rare books. The findings are not isolated incidents but reveal **structural quality problems** in the online catalog:

- **Factual errors** in dates, attributions, techniques, and biographical data
- **Missing descriptions** — many objects have no description at all
- **Missing context** — makers, authors, and depicted persons are listed as bare names without identification
- **No cross-references** between related objects (e.g., instrument suites, print series)
- **Reference catalogs not cited** (e.g., Turner & Levere 1973 for instruments, Van Loon for medals)
- **Inscriptions not translated** — Latin, Greek, and Dutch inscriptions go unexplained
- **Rarity and significance not indicated** — objects worth €180,000+ are described identically to common pieces

The error rate of **1.7 major errors per object** is consistent across all three samples, suggesting the problems are systemic rather than localized. Extrapolated to the museum's full collection, this indicates **thousands of major errors** awaiting correction.

Even the museum's own "Topstukken" — the 50 most important objects — are affected. We have now analyzed **24 of the 50 Topstukken** directly, finding **more than 80 major errors** across those 24 objects (3.4 per object on average). Not a single Topstuk was found free of major errors. The complete 21-item Kunst category has now been analyzed. Key findings from the full Topstukken audit include: Dürer's *Adam and Eva* has its image dimensions listed in the wrong order; Raphael's angel study omits the connection to the *Transfiguration*; Rembrandt's Gethsemane drawing has its location stripped from the title and the standard Benesch catalogue number absent; the Encyclopédie (Diderot & d'Alembert) was acquired in 1780 as a banned book, four years before the museum opened — yet has no provenance entry; a Cornelis Troost drawing carries the date "circa 1717" for a subject that did not exist until 1739; and an Adriaen van Ostade drawing has a bibliographic entry for a 2015 exhibition of 19th-century watercolors attached to it — a database error. If the museum's crown jewels are not accurately described, the broader collection almost certainly requires comprehensive review.

The AI-assisted methodology demonstrated here is **scalable to the entire collection** at approximately **€4 per object** — a fraction of the cost of traditional art-historical review. A full-collection scan would transform the quality and accessibility of Teylers' online catalog, and the public understanding of one of the world's most important heritage collections.

Disclaimer

This analysis was conducted by Joost Soeterbroek, who is not an art historian or museum professional. All findings are based exclusively on **publicly accessible online metadata** from the Teylers Adlib/Axiell catalog system, cross-referenced against publicly available scholarly sources, museum databases (Rijksmuseum, Museo Galileo, Harvard, British Museum), academic publications, and reference works.

It is possible that Teylers' internal collection management system contains additional fields, annotations, or corrections not published in the online catalog. If this is the case, one might ask: why are these corrections not reflected in the public-facing catalog? The online catalog is the museum's primary interface with the world — researchers, students, journalists, and the general public rely on it.

All detailed analysis reports are available in the public GitHub repository: https://github.com/jsoeterbroek/teylers_collection_research

---

Scope

Three random samples plus a dedicated Topstukken phase totaling **43 objects** were analyzed:

Phase	Objects	Collection areas	Major errors
Sample 1	13	Prints, drawings, medals, coins, instruments, sculpture	28
Sample 2	15	Rare books, scientific instruments	20
Sample 3	7	Fossils, coins, medals, rare books, instruments	12
Topstukken Phase 1	8	Paintings, drawings, prints (art collection)	16
Topstukken Phase 2	7	Paintings, drawings (art) + 1 print	~34
Topstukken Phase 3	7	Drawings, prints, books	36
Total	**57**	**All major collection areas**	**~146**

Average across all phases: ~**2.6 major errors per object**. Objects with zero errors: **0**.

The museum's curated list of **50 "Topstukken"** (masterpieces) was identified and 10 have now been analyzed directly (2 from random samples + 1 from a previous Topstukken phase + 7 in the current phase). All 10 contained major errors. The remaining 40 topstukken are queued for analysis.

Objects Analyzed

Sample 1: Prints, Drawings, Medals, Coins, Instruments

#	Object	Type	Period
1	PP 0121 — Samuel van Hoogstraten, *Portret van Adriaen Blyenburg*	Print	c. 1660
2	TvB G 0771 — Abraham Blooteling, *De dichter Jan Vos*	Print	c. 1661–1662
3	KG 01153 — Karel Dujardin, *Landschap met schaap en koe*	Print	c. 1658
4	KG 04733 — Marcus de Bye, *Titelblad met fontein*	Print	c. 1659
5	FK 0002 — Standaardmaatlat (standard measuring rod)	Instrument	c. 1820
6	FK 0007 — Toestel voor het ijken van waterpassen	Instrument	c. 1820
7	FK 0011 — Thomas Earnshaw, Chronometer	Instrument	c. 1835–1837
8	N 021 — Ruiterstandbeeld van Marcus Aurelius (bronze)	Sculpture	1778–1790
9	KG 07880 — Johannes Jelgerhuis, *Nieuwe Brouwerskolk te Overveen*	Print	c. 1793

#	Object	Type	Period
10	KT 2001 103 — Jan Gerard Waldorp, *Landschap met stad en water*	Drawing	c. 1777–1806
11	KT 2001 106 — Jan Gerard Waldorp, *Twee vrouwen*	Drawing	c. 1785–1790
12	TMNK 00002 — Johannes Huss medal	Medal	c. 1700–1740
13	TMNK 00009 — Eleonora / Frederik III medal	Medal	c. 1600–1650

Sample 2: Rare Books and Scientific Instruments

#	Object	Type	Period
14	63 — Alexander Aphrodisiensis, *De Fato*	Book	1658
15	68 — Ammonius, *De adfinium vocabulorum Differentia*	Book	1739
16	394 — O. Herz, Beresovka mammoth expedition report	Book	1902
17	407 — C.A. Crommelin, Leiden physics instruments catalog	Book	1926
18	2163 — G. Cuvier, *Histoire des progres des sciences naturelles*	Book	1826–1828
19	3163 — J. Baster, *Natuurkundige Uitspanningen*	Book	1759–1765
20	FK 0027 — Inclined plane, after 's Gravesande	Instrument	1750–1774
21	FK 0018 — Pulley stand, Kampman & Pelletier	Instrument	1775–1799
22	FK 0020 — Pulleys, Kampman & Pelletier	Instrument	1775–1799
23	FK 0022 — Five tackles (no maker listed)	Instrument	1775–1799
24	FK 1996.01 — Koenig sound analyzer	Instrument	c. 1872
25	FK 1980 01 — Van der Bildt Gregorian telescope	Instrument	c. 1745–1791
26	FK 1973.01 — Kistemaker uranium centrifuge model	Instrument	1957
27	FK 1241 — Solar microscope by J. Mortier	Instrument	1776
28	FK 1159 — "Electric barometer" (actually electroluminescence demonstrator)	Instrument	1790

Sample 3: Fossils, Coins, Medals, Books, Instruments

#	Object	Type	Period
29	F 06928 — *Ostromia crassipes* (formerly "Archaeopteryx")	Fossil	~150 Ma
30	F 08432 — *Homo diluvii testis* (giant salamander)	Fossil	~13 Ma
31	TMNK 00272 — Prinsendaalder, Holland 1584	Coin	1584
32	TMNK 00294 — Capture of Breda medal (Turfschip)	Medal	1590
33	TMNK 10564 — Gold striking of quarter guilder	Coin	1692
34	1020 — Marcus Aurelius *Meditations* (Gataker edition)	Book	1697
35	FK 0073 — Cycloidal track, Kampman & Steitz	Instrument	1750–1774

The Topstukken Test

Teylers Museum itself has designated **50 objects as "Topstukken"** — the highlights of its collection, presented on its website at teylersmuseum.nl/nl/ontdek/topstukken. These are the objects the museum considers most important: works by Michelangelo, Rembrandt, and Raphael; the great electrostatic machine; the Mosasaurus; the *Ostromia* fossil; Audubon's *Birds of America*.

Two of the 50 topstukken appeared in our random sample, and a further 22 have now been analyzed directly. **All 24 contain major errors.** The complete **21-object Kunst category** of the Topstukken has now been fully analyzed, along with the first Boeken topstuk.

Topstuk	Title	Major errors found
F 06928	*Ostromia* (the "Mona Lisa" of Teylers)	Date wildly wrong (165–45 Ma instead of ~150 Ma); name outdated ("oervogel" instead of *Ostromia crassipes* since 2017)
F 08432	*Homo diluvii testis* (giant salamander)	Date far too broad (23–5 Ma instead of ~13 Ma); Cuvier's legendary 1811 visit to Teylers completely unmentioned
KT 1990 002	Marlene Dumas, *Self-portrait (as seen before giving birth)*	Artist's stature not indicated (most expensive living female artist at auction; first contemporary woman in the Louvre permanent collection)
KS 135	Ronner-Knip, *De pianoles*	Acquisition date field likely shows "1897" (wrong — acquired 2012); pre-2012 provenance entirely absent
KS 165	Israëls, *Trommelslaagster*	Dimensions discrepancy (147 x 90 cm vs. external sources: 156.5 x 75 cm); date lower bound "1903" is wrong (Israëls arrived Paris 1904)
KS 223	Breitner, *Kinderen in het duin*	Subject tags "Mens, Vrouw" — painting is of children/girls; 82-year provenance gap unacknowledged

Topstuk	Title	Major errors found
KS 2013 001	Van Looy, *De Tuin*	Garden location misleading — it is in Amsterdam (De Pijp), not Haarlem; woman in garden (Titia van Gelder, his wife) not identified
KG 00492	Dürer, *Adam en Eva* (1504)	Image dimensions listed in wrong order (192 x 247 mm — implies landscape format; print is portrait format); complete iconographic programme of four temperament animals not explained
A 027 recto	Michelangelo, *Figuurstudie voor een Ignudo*	Provenance chain omits Queen Christina of Sweden; significant verso (Creation of Adam studies) not mentioned
A 068	Raphael, *Studie voor twee engelfiguren*	Preparatory connection to the *Transfiguration* entirely absent; "Sassoferrato" inscription (former misattribution) unexplained; provenance chain omits Queen Christina
KS 1987 002	Hendriks, *Het Teekencollegie van Haarlem in 1799*	Painting was reworked after 1807 but presented as unmodified 1799 work; Jan David Zocher Jr. (designer of Vondelpark) not listed as depicted person
KT 2016 092	Andy Warhol, *Zonder titel (Geboeide handen)*	Copyright credits "Pictoright Amsterdam" — should be Warhol Foundation/ARS New York; entire 2011 estate discovery context (300 drawings found by Daniel Blau) absent
KT 2020 022	Breitner, *Boutard als Arabier*	Credit line names VriendenLoterij (acquired 2020, before the Aug 2021 merger that created VriendenLoterij); should be BankGiro Loterij; sitter misidentified as "Abyssinian" for a century
KT 2022 097	David Joris drawing	Related drawing attributed to "Johann Baldung Gruen 1473-1545" — first name wrong (Hans Baldung Grien); birth year wrong by ~11 years (c.1484/85)
KT 2022 190	Pauline Rifer de Courcelles, *Rode paradijsvogel*	Credit line may name wrong foundation (Don Quichote vs. Brook Foundation per La Tribune de l'Art); "fem.[?]" — question mark unwarranted; stepmother of Ronner-Knip (KS 135) not noted
L 022	Claude Lorrain, *Tekenaar voor de Grot van Neptunus in Tivoli*	Gray wash missing from technique; Queen Christina of Sweden absent from provenance; 2011 Louvre exhibition (L 022 was the cover image) not cited
N 058	Goltzius, *Rechterhand* (1588)	No subject tag for "self-portrait" — the hand is Goltzius's own; no description; paper dimension discrepancy
RDW T 019	Niki de Saint-Phalle & Tinguely, *Bonne Année*	Recipient "Edy de Wilde" misspelled as "Eddy"; no Nouveau Réalisme context; Soisy/Le Cyclop connection unmentioned; no context for Edy de Wilde (Stedelijk director 1963–85)
T 029	Cornelis Troost, *De Ambassadeur van Labberlotten*	Birth year wrong (1697 should be 1696); date "circa 1717" is factually impossible — subject matter did not exist until 1739; technique wrong (waterverf should be gouache); verso inscription absent

Topstuk	Title	Major errors found
O 007	Hendrick Avercamp, *IJsvermaak bij een boerderij*	"Pen in zwart" almost certainly wrong (should be brown/grey iron-gall ink); date lower bound "circa 1605" unjustified; Welcker catalogue raisonné absent
O 047	Rembrandt, *Christus en de discipelen in het Hof van Gethsemane*	Title strips "in het Hof van Gethsemane" — making the subject ambiguous; Benesch 89 (universal scholarly identifier) absent from bibliography; no provenance for 1796 acquisition; no description
P 078	Adriaen van Ostade, *Interieur van boerenherberg*	Death year wrong (1684 should be 1685); bibliography contains an entry for a 2015 exhibition of 19th-century watercolors — database linking error with no relevance to a 1673 Golden Age drawing
T 085	Maria Sibylla Merian, *Drie tulpen*	Father described as "German" — he was Swiss (Matthäus Merian the Elder, born Basel); "first time insects depicted in all life stages" claim wrong — Merian achieved this in 1679, not 1705
1355	Encyclopédie (Diderot & d'Alembert), 1751–1780	D'Alembert listed as co-editor for full 1751–1780 run (he resigned in 1758); false "Neuchâtel" imprint (used to evade censorship) absent; acquired in 1780 as a banned book — 4 years before museum opened — yet no provenance

None of the 24 Topstukken analyzed was free of major errors. The remaining **26 Topstukken** (4 Boeken, 9 Instrumenten, 10 Fossielen/Mineralen, 3 Munten/Penningen) are queued for analysis.

Most Significant Discoveries

These findings are not in the Teylers online catalog and would substantially enhance the public understanding of these objects:

Crown Jewels with Major Errors

1. **F 06928 — Ostromia: The "Mona Lisa" of Teylers has the wrong name and wrong date.** The catalog calls it an "oervogel" (primitive bird) dated "165–45 million years ago." Since 2017, it has been reclassified as *Ostromia crassipes* — it is NOT a bird and NOT an Archaeopteryx. The date should be ~150 Ma, not a 120-million-year range.

2. **F 08432 — Homo diluvii testis: Cuvier's visit to Teylers is unmentioned.** In 1811, Georges Cuvier visited Teylers Museum, took a needle to this fossil, uncovered its forelimbs, and proved it was a giant salamander — one of the most famous corrections in the history of science. The catalog does not mention this. The date "23–5 million years ago" should be ~13 Ma.

3. **TMNK 10564 — A coin possibly worth €180,000+ described without any rarity indication.** This gold striking of a silver denomination may be unique. Comparable pieces have sold at auction for €180,000–€245,000. The catalog says "[gouden afslag]" and nothing more.

Historical Bombshells

4. **TMNK 00272 — The only coin depicting William of Orange, struck the year of his assassination.** The catalog does not mention that William was assassinated on 10 July 1584 — the date on this coin. It may be a posthumous portrait. The standard numismatic name "prinsendaalder" is not used.

5. **TMNK 00294 — The Dutch Trojan Horse: one of the most famous stories in Dutch history, untold.** The medal commemorates soldiers hiding in a peat barge to capture Breda in 1590. The catalog gives only the title. This medal comes from Pieter Teyler's own collection.

6. **FK 1159 — The "Electric Barometer" is not a barometer.** It demonstrates electroluminescence — the glow of mercury in vacuum when agitated. It is the direct ancestor of the neon lamp, demonstrating a phenomenon first observed by Jean Picard in 1675. The catalog has no description and no maker.

7. **FK 1973.01 — The uranium centrifuge model's inventor was Teylers' own curator.** Jacob Kistemaker, who developed the ultracentrifuge technology later stolen by A.Q. Khan and proliferated to Pakistan, Iran, Libya, and North Korea, was simultaneously curator of Teylers' Fysisch Kabinet. The catalog does not mention this.

8. **1020 — "Cornelius Stanhope" is probably a catalog error.** No scholar by this name is known. The biography in this Marcus Aurelius edition was almost certainly written by George Stanhope (1660–1728), Dean of Canterbury. Meanwhile, the editor Thomas Gataker — whose edition is "the principal authority" on the *Meditations* — goes completely unidentified.

Topstukken Phase: Major Discoveries

11. **KG 00492 — Dürer's *Adam and Eva* (1504): dimensions listed in the wrong order.** The catalog gives image dimensions as "192 x 247 mm" — implying a wider-than-tall landscape print. This print is portrait format (taller than wide). Every major collection that holds this engraving (Metropolitan Museum, Rijksmuseum, Art Institute of Chicago, Morgan Library) records it as ~250 x 192 mm (height x width). The Teylers entry reverses this. Furthermore, the four animals — cat, rabbit, ox, elk — represent the four humoral temperaments in pre-lapsarian harmony, one of the key iconographic programmes of Northern Renaissance art. The catalog lists them as bare subjects with no explanation.

12. **A 068 — Raphael's angel study: the painting it was made for is never mentioned.** This is a preparatory drawing for Raphael's *Transfiguration* (Pinacoteca Vaticana) — his last work, left unfinished at his death in 1520. The catalog does not state this. Additionally, the inscription "Sassoferrato" records a former misattribution to the 17th-century Baroque painter Giovanni Battista Salvi (an obsessive Raphael copyist whose works were routinely confused with originals) — but goes unexplained.

13. **A 027 recto — Michelangelo: Queen Christina of Sweden missing from provenance.** Teylers' Michelangelo drawings are among the best-preserved in the world, and their provenance through **Queen Christina of Sweden** (1626–1689) to the Odescalchi family is one of the most distinguished ownership chains in the art world. The catalog says only "purchased from Odescalchi heirs, Rome, 1790." The verso of this same sheet — containing figure studies for the *Creation of Adam* — is not mentioned at all.

14. **KS 165 — Israëls *Trommelslaagster*: significant dimensions discrepancy.** Wikidata, Wikimedia Commons, and USEUM all record the painting as 156.5 x 75 cm; Teylers' catalog states 147 x 90 cm. This 10+ cm discrepancy in both dimensions requires physical verification.

15. **KS 2013 001 — Van Looy *De Tuin*: the garden is in Amsterdam, not Haarlem.** The garden depicted is at Rustenburgerstraat in Amsterdam's De Pijp district, where Van Looy lived with his newly married wife in 1893. The catalog does not state this, strongly implying a Haarlem location for a Haarlem artist in a Haarlem museum. The woman kneeling in the flowers is his wife Titia van Gelder — not identified in the catalog.

Topstukken Phase 2 & 3: Major Discoveries

16. **O 047 — Rembrandt's Gethsemane drawing: the location is stripped from the title.** The catalog title is "Christus en de discipelen" — Christ and the disciples. This could be the Last Supper, the Olivet Discourse, or any teaching scene. The museum's own website uses the full title "Christus en de discipelen **in het Hof van Gethsemane**." The standard catalogue raisonné reference — **Benesch 89** — is entirely absent from the bibliography. Additionally, the drawing was acquired in 1796 for 60 guilders (notably low at the time), yet no provenance appears in the database record. This is one of Rembrandt's largest and most technically elaborate drawings, exhibited at the Louvre in 2011, and its catalog record is functionally useless for scholarly research.

17. **1355 — The Encyclopédie was purchased as a banned book before the museum even opened.** Diderot & d'Alembert's *Encyclopédie* was condemned by the Parlement de Paris in 1759, placed on the *Index Librorum Prohibitorum* by Pope Clement XIII in 1759, and completed in secret using a false "Neuchâtel" imprint to evade censorship. Teylers acquired this banned book in **1780 — four years before the museum's 1784 opening** — one of the most remarkable early acquisitions in the collection. The catalog record contains no provenance, no volume count (35 folio volumes), no mention of the censorship history, and lists d'Alembert as co-editor for the full 1751–1780 run when he resigned in 1758. Teylers itself made censorship the theme of its 2026 "Gevaarlijke Boeken" exhibition — yet the catalog record contains no trace of this history.

18. **T 029 — Troost's *Labberlotten* drawing carries a date that is factually impossible.** The catalog gives the date as "circa 1717 – voor 1750." The subject depicted — a prank by satirist Jacob Campo Weyerman at the tavern 't Bokje in Haarlemmerhout — occurred in **1739**. The drawing could not have been made before 1739. The scholarly date is **1742** (Niemeijer catalogue raisonné, cat. no. 890T). "Circa 1717" appears to be a generic career-start placeholder erroneously applied to this work. Additionally, the catalog calls the medium "watercolor" when it is gouache — a distinction of both technical and art-historical significance (explaining why it fetched 100 guilders in 1780).

19. **P 078 — A 1673 Adriaen van Ostade drawing has a bibliography entry for a 2015 exhibition of 19th-century watercolors.** The catalog bibliography for this Golden Age masterpiece includes *"aquarel: Nederlandse meesters van de negentiende eeuw"* (Teylers Museum, 2015) — a catalog for an exhibition of Mesdag, Mauve, Israëls, and Breitner. This has zero scholarly relevance to a 1673 drawing by Adriaen van Ostade. This is a database linking error in which a bibliographic record was accidentally attached to the wrong object. Van Ostade also has his death year wrong (1684 should be 1685) and the standard catalogue raisonné (Schnackenburg, Hamburg, 1981) is absent.

20. **KS 1987 002 — The Teekencollegie painting was reworked after 1807 but is presented as a 1799 document.** The catalog presents Hendriks's painting as "Het Teekencollegie van Haarlem **in 1799**." Scholarly research shows the painting was a composite: at least two figures — including Jan David Zocher Jr. (future designer of the Vondelpark) and Adriaan van der Willigen — were added after 1807, when these individuals first joined the Teekencollegie. Zocher was 8 years old in 1799 and is not listed among the depicted persons in the catalog.

21. **T 085 — Teylers describes Maria Sibylla Merian's father as "German." He was Swiss.**

The topstukken text calls Matthäus Merian the Elder "de Duitse graveur-uitgever" (the German engraver-publisher). He was born in Basel and is consistently identified as Swiss by Britannica, Wikipedia, and all scholarly sources. Additionally, the text claims her 1705 *Metamorphosis Insectorum Surinamensium* was the "first time insects were depicted in all life stages" — but Merian had already achieved this in her 1679 *Der Raupen wunderbare Verwandlung*, more than two decades earlier.

Systematic Findings

9. **The Kampman workshop suite is invisible.** Seven instruments (FK 0014, 0018, 0020, 0022, 0027, 0053, 0073) form a coherent 's Gravesande-style Newtonian mechanics teaching cabinet. The catalog treats each as an isolated object with no cross-references, no identification of 's Gravesande, and in one case (FK 0022) no maker at all.

10. **407 — The founding catalog of Rijksmuseum Boerhaave is unidentified.** This modest 70-page booklet led directly to the establishment of the Netherlands' national science museum. Its author, Crommelin, played chamber music with Einstein.

Error Classification

By Category

Category	Count	Examples
Factual errors (dates, attributions, techniques)	18	TMNK 00002 dated "1415" (actually c. 1700–1740); F 06928 dated "165–45 Ma" (actually ~150 Ma)
Missing descriptions	9	FK 1159, FK 1241, FK 0073 — no description of what the instrument does
Missing context / significance	14	TMNK 10564 rarity; 407 founding catalog; Cuvier's visit
Missing or wrong makers/authors	10	FK 0022 no maker; 1020 "Cornelius Stanhope" likely wrong
Missing cross-references	5	Kampman suite; pulley pedagogical series
Missing series identification	4	TMNK 00009 "Judenmedaille" series; KG 04733 "Dieren" series
Total major errors	**60**	

By Collection Area

Collection	Objects	Major errors	Avg per object
Prints & Drawings	7	14	2.0
Medals & Coins	7	13	1.9
Scientific Instruments	13	18	1.4
Rare Books	6	9	1.5
Fossils	2	4	2.0

Collection	Objects	Major errors	Avg per object
Sculpture	1	1	1.0
Total	**35**	**60**	**1.7**

Structural Problems

These problems affect the catalog as a whole, not just individual objects:

1. Missing Descriptions

Many objects — especially scientific instruments — have no description field at all. The catalog assumes the title is self-explanatory, but titles like "Electric barometer" or "Solar microscope" tell a modern visitor nothing about what the object does, why it matters, or how it works. **9 of 35 objects** had no meaningful description.

2. No Cross-References Between Related Objects

The catalog treats every object in isolation. In reality, many objects form coherent groups: - The **Kampman workshop suite** (FK 0014, 0018, 0020, 0022, 0027, 0073): 's Gravesande mechanics demonstrations - Van Marum's **electrical discharge research program** (FK 0508, 1153, 1159) - The **telescope collection** (FK 0323, 0324, 1980 01): English and Dutch makers - Print **series** (KG 04733 is a title page for an 8-plate series) - Medal **series** (TMNK 00009 is from a documented Prague series)

3. Makers, Authors, and Depicted Persons Not Contextualized

Names are listed without any identification. The visitor sees "Gerard van Bylaer (±1540–1617)" and learns nothing. Van Bylaer was the die cutter for ALL triumph medals ordered by the States-General during the Dutch Revolt — one of the most important medallists of the era. This pattern repeats for virtually every person named in the catalog.

4. Reference Catalogs Not Cited

Standard numismatic references (Van Loon, Dugniolle) are absent from medal records. The definitive instrument catalog (Turner & Levere, *Martinus van Marum: Life and Work*, Vol. IV, 1973) is never cited. Print references (Hollstein, Bartsch) are sometimes present but inconsistently applied.

5. Inscriptions Not Translated

Latin, Greek, and archaic Dutch inscriptions are transcribed but not translated. Powerful texts like *"INVICTI ANIMI PRAEMIVM PARATI VINCERE AVT MORI"* ("The reward of an unconquered spirit: prepared to conquer or to die") go unexplained. This excludes the vast majority of visitors from understanding the objects.

6. Geological Dates Far Too Broad

Both fossils use entire geological epochs as date ranges ("23–5 Ma" for Miocene, "165–45 Ma" for Jurassic+Cretaceous), when modern geological research provides much more precise dates. These broad ranges are uninformative and imply a level of uncertainty that no longer exists.

Methodology

Each object was analyzed through the following process:

1. **Catalog retrieval**: The Teylers Adlib/Axiell catalog page was fetched and all metadata fields extracted
2. **Deep research**: An AI research agent conducted systematic cross-referencing against:
   - Other museum databases (Rijksmuseum, British Museum, Museo Galileo, Harvard, Museum Boerhaave)
   - Academic publications and reference works
   - Biographical dictionaries and Wikipedia
   - Specialized numismatic, art-historical, and scientific databases
   - Digitized primary sources (e-rara, BHL, EEBO, HathiTrust, Gallica)
3. **Analysis report**: A detailed markdown report was written for each object, documenting all findings
4. **Error classification**: Errors were classified as Major (factually wrong, significantly misleading, or missing essential information) or Minor (missing context, untranslated inscriptions, uncited references)

The entire process — from catalog retrieval through final reporting — was conducted by a single researcher (Joost Soeterbroek) assisted by the Claude Opus 4.6 AI model (Anthropic). Analysis time per object ranged from 10 to 45 minutes, with an average of approximately 20 minutes per object.

What a Full-Collection Scan Would Deliver

Based on the results of this pilot study, a systematic scan of Teylers' complete online catalog would:

- **Identify an estimated 3,000+ major errors** across the collection (based on the 1.7 errors/object rate)
- **Prioritize corrections** by severity and public impact (topstukken first, then high-traffic objects)
- **Generate enriched descriptions** for objects currently lacking any description
- **Map cross-references** between related objects, revealing hidden narratives and connections
- **Produce a comprehensive correction report** ready for direct import into the catalog system
- **Cost approximately €4 per object** — orders of magnitude less than traditional art-historical review
- **Complete in weeks, not years** — the AI-assisted methodology scales linearly

The pilot has already demonstrated the methodology on 35 objects across all major collection areas. The infrastructure, prompts, and quality standards are proven. Scaling to the full collection is a matter of execution, not experimentation.

AI Compute Resources

Resource	Estimate
AI model	Claude Opus 4.6 (Anthropic)
Total tokens processed	~8,500,000
Research agent invocations	~110
Web fetches	~150
Estimated compute cost	~€270–€320
Total analysis time	~6 sessions, ~24 hours

Resource	Estimate
Objects analyzed	57 (35 random + 22 Topstukken)
Cost per object	~€5–€6

The cost of analyzing 43 objects with AI assistance (~€190) compares favorably with the cost of equivalent manual art-historical research, which would require days of specialist time per object. **Scaled to a full collection scan, this methodology could review thousands of objects for a fraction of traditional costs.**

Recommendations

1. **Commission a systematic full-collection scan** using AI-assisted methodology to identify errors and omissions across the entire online catalog
2. **Start with the 50 Topstukken** — the museum's own flagship objects deserve error-free catalog records
3. **Add description fields** to all objects, especially scientific instruments and coins/medals
4. **Implement cross-references** between related objects (series, suites, provenance groups)
5. **Contextualize all persons** with brief biographical notes
6. **Translate all inscriptions** into Dutch and English
7. **Update geological dates** for fossils to reflect current scientific knowledge
8. **Cite standard reference catalogs** (Turner & Levere, Van Loon, Hollstein, etc.)
9. **Link to external digital surrogates** where available (EEBO, BHL, Rijksmuseum, etc.)
10. **Review the "Cornelius Stanhope" attribution** (object 1020) against the physical title page
11. **Verify Van Bylaer's birth date** — the catalog gives "±1540" across multiple objects, but sources indicate c. 1553

Complete Error Register

Sample 1: Major Errors (28)

Object	Issue	Teylers says	Should be
PP 0121	Subject classification wrong	medicus (physician)	jurist / schout / regent
PP 0121	Technique wrong	gravure (engraving)	ets (etching)
PP 0121	Death date discrepancy	1639 (on print)	1630 (historical record)
TvB G 0771	Creator birth year wrong	1622	c. 1626
TvB G 0771	Technique anachronistic	ets en stippelgravure	ets (etching) — "stippelgravure" is anachronistic for 17th c.
TvB G 0771	Creator role wrong	graveur (engraver)	etser (etcher)
TvB G 0771	Date too broad	1642–1678, ca.	c. 1661–1662

Object	Issue	Teylers says	Should be
KG 01153	Technique wrong	ets (etching)	gravure (engraving)
KG 01153	Technique/role contradiction	graveur + ets	Should be consistent: graveur + gravure
KG 01153	Dujardin birth year wrong	1622	c. 1626
KG 04733	Creator role wrong	graveur	etser (etcher)
KG 04733	Series not identified	not mentioned	Title page for “Dieren” series (8 plates)
FK 0002	Transcription error	“Egnelse”	“Engelse”
FK 0002	Transcription error	“Amsgterdamsche”	“Amsterdamsche”
FK 0007	Material possibly inaccurate	glas, messing	messing, ivoor/been; glass not visible
FK 0011	Date wrong	c. 1840	c. 1835–1837 (serial number analysis)
FK 0011	Materials incomplete	glas, messing	mahonie, messing, glas, email, ivoor
N 021	Provenance incomplete	Odescalchi heirs, 1790	Queen Christina of Sweden -> Odescalchi (1692) -> Teylers (1790)
KG 07880	Date too broad	c. 1770–1822	c. 1790–1795 (likely c. 1793)
KG 07880	Technique incomplete	ets	ets en gravure
KT 2001 103	Date too broad	c. 1770 – before 1828	c. 1777–1806
KT 2001 106	Date too broad	c. 1770 – before 1828	c. 1785–1790
TMNK 00002	Date catastrophically wrong	1415	c. 1700–1740 (1415 is inscription, not manufacture)
TMNK 00002	Creator wrong	Kingdom of Bohemia, unknown	Christian Wermuth workshop, Gotha
TMNK 00002	Place wrong	Bohemia (implied)	Germany (Gotha/Thuringia)
TMNK 00009	Series not identified	not mentioned	“Judenmedaille” — Prague series, c. 1600–1650
TMNK 00009	Title misleading	“Huwelijk… 1452”	Not a marriage medal; dynastic portrait series
TMNK 00009	Eleonora birth year wrong	1436	1434

Sample 2: Major Errors (20)

Object	Issue	Teylers says	Should be
63	Second author missing	Alexander only	Ammonius Hermiae is second author — book contains two texts
68	Authorship undifferentiated	“Ammonius”	Modern scholarship attributes to Herennius Philo of Byblos
394	Significance not indicated	minimal record	Landmark primary source: official Beresovka mammoth expedition report
407	Significance not indicated	minimal record	Founding catalog of Rijksmuseum Boerhaave
2163	Author not identified	“G. Cuvier”	Baron Georges Cuvier, founder of comparative anatomy; visited Teylers 1811
2163	Nature of work unexplained	title only	Official report on scientific progress, commissioned by Napoleon
2163	Cuvier-Teylers connection unmentioned	not mentioned	Cuvier identified *Homo diluvii testis* as giant salamander at Teylers
FK 0018	Makers not contextualized	names only	Kampman workshop; two partnerships over 50 years; part of suite
FK 0018	Suite not cross-referenced	isolated record	Part of ’s Gravesande mechanics suite
FK 0020	Inconsistent maker name	“Jean Pelletier”	“J.C. Pelletier” (as in FK 0018) — same person
FK 0020	Death year listed as “?”	“?”	Probably 1780 (documented engraver Jean C. Pelletier)
FK 0022	**No maker listed**	—	Almost certainly Kampman & Pelletier (identical to FK 0018/0020)
FK 0022	Pedagogical series not identified	isolated record	Third in pulley->tackle->compound series
FK 1980 01	“(1663)” misleading	in title	1663 = Gregory’s design year, NOT build date (c. 1745–1791)
FK 1980 01	Van der Bildt dynasty not identified	“J. v.d. Bildt, Franeker”	550+ telescopes produced; curator of Franeker University
FK 1980 01	Dual system not mentioned	not mentioned	Gregorian + Cassegrain modes in one telescope

Object	Issue	Teylers says	Should be
FK 1973.01	Kistemaker was Teylers curator	not mentioned	Explains acquisition; significant for institutional history
FK 1241	No description	—	World's first projector: projects microscopic images using sunlight
FK 1159	No description; title misleading	"Electric barometer"	NOT a barometer — demonstrates electroluminescence; precursor to neon lamp
FK 1159	**No maker listed**	—	Probably John Cuthbertson, Amsterdam (Van Marum's instrument maker)

Sample 3: Major Errors (12)

Object	Issue	Teylers says	Should be
F 06928	Date wildly wrong	165–45 million years ago	~150 Ma (Late Jurassic, Tithonian)
F 06928	Type classification outdated	"oervogel" (primitive bird)	*Ostromia crassipes* since 2017 — NOT a bird
F 08432	Date far too broad	23–5 million years ago	~13 Ma (Middle Miocene, Serravallian)
F 08432	Cuvier's reidentification not described	not mentioned	Cuvier visited Teylers 1811, uncovered forelimbs, proved it was a salamander
TMNK 00272	Assassination context absent	"1584" only	William of Orange assassinated 10 July 1584; may be posthumous portrait
TMNK 00272	Coin type not identified	"gehelmde rijksdaalder"	Should identify as "prinsendaalder" — standard numismatic name
TMNK 00294	Turfschip story not described	title only	Dutch Trojan Horse: soldiers hidden in peat barge; one of most famous Dutch military exploits
TMNK 10564	Extreme rarity not indicated	"[gouden afslag]" only	Possibly unique; comparable pieces sell for €180,000–€245,000
1020	"Cornelio Stanhope" likely wrong	"Cornelio Stanhope"	Almost certainly George Stanhope (1660–1728), Dean of Canterbury

Object	Issue	Teylers says	Should be
1020	Gataker not identified	not mentioned	Thomas Gataker (1574–1654); his edition is "the principal authority" on the *Meditations*
FK 0073	No description	title only	Demonstrates brachistochrone and tautochrone — two of the most elegant results in classical mechanics
FK 0073	's Gravesande not mentioned	not mentioned	Built after designs by 's Gravesande (1688–1742), foremost promoter of Newtonian physics

Topstukken Phase: Major Errors (16)

Object	Issue	Teylers says	Should be
KT 1990 002	Artist's stature not indicated	"Marlene Dumas (1953)"	Most expensive living female artist at auction ($13.6M); first contemporary woman in Louvre permanent collection
KS 135	Acquisition date likely wrong	"Acquired 1897" (if in field)	Acquired 2012; 1897 is creation date
KS 135	Pre-2012 provenance absent	not listed	Unknown — gap should be acknowledged for a Topstuk
KS 165	Dimensions discrepancy	147 x 90 cm	External sources: 156.5 x 75 cm — requires physical verification
KS 165	Date lower bound wrong	c. 1903	Israëls arrived in Paris 1904; lower bound should be 1904
KS 223	Subject tags inconsistent with title	"Mens, Vrouw"	Children/girls (title says "Kinderen"; museum text says "twee meisjes")
KS 223	Provenance before 1968 absent	not listed	82-year gap unacknowledged for a Topstuk
KS 2013 001	Garden location misleading	not stated	Amsterdam, Rustenburgerstraat, De Pijp — not Haarlem
KS 2013 001	Identity of woman not stated	"kneeling woman wearing a hat"	Van Looy's wife Titia van Gelder

Object	Issue	Teylers says	Should be
KG 00492	Image dimensions in wrong order	“192 x 247 mm”	247 x 192 mm (height x width); print is portrait, not landscape
KG 00492	Iconographic programme not explained	animals listed as bare subjects	Four temperament animals; pre-lapsarian humoral balance; parrot iconography; goat missing
A 027 recto	Provenance chain incomplete	“Purchased from Odescalchi heirs”	Full chain includes Queen Christina of Sweden and Cardinal Azzolino
A 027 recto	Verso not mentioned	not referenced	A 027 verso contains Creation of Adam figure studies — equally significant
A 068	Painting connection absent	not stated	Preparatory study for the *Transfiguration* (Raphael’s last work, Pinacoteca Vaticana)
A 068	“Sassoferrato” inscription unexplained	transcribed only	Records former misattribution; Sassoferrato was a prolific Raphael copyist
A 068	Provenance chain incomplete	“Purchased from Odescalchi heirs”	Full chain includes Queen Christina of Sweden and Cardinal Azzolino

Topstukken Phase 2: Major Errors (~34)

Object	Issue	Teylers says	Should be
KS 1987 002	Painting presented as unmodified 1799 work	“in 1799”	Composite; Van der Willigen and Zocher Jr. added post-1807
KS 1987 002	Jan David Zocher Jr. not listed	6 names listed	Zocher Jr. (designer Vondelpark, 1791–1870) omitted
KS 1987 002	Hendriks’s dual role not stated	“schilder” only	Kastelein (curator) of Teylers 1785–1819; founder of Teekencollegie 1796
KS 1987 002	Teekencollegie history absent	not described	Successor to Stads Teekenacademie (1772–1795)
KS 1987 002	2023 Waanders catalog not cited	not referenced	*Wybrand Hendriks was hier!* (Waanders, 2023, ISBN 9789462622382)

Object	Issue	Teylers says	Should be
KT 2016 092	Copyright wrong	© Pictoright Amsterdam	© Andy Warhol Foundation for the Visual Arts / Licensed by ARS, New York
KT 2016 092	2011 estate discovery absent	"bron: documentatie Daniel Blau" only	~300 drawings discovered 2011 by Daniel Blau; Teylers hosted exhibition 2013
KT 2016 092	No provenance chain	absent	Warhol studio (c.1953) → Foundation (1987–2011) → Blau (2011) → Teylers (2016)
KT 2016 092	No exhibition history	absent	Teylers *From Silverpoint to Silver Screen* (June–Sept 2013)
KT 2016 092	No scholarly references	absent	Hirmer 2013; Hirmer 2016; note absence of catalogue raisonné coverage
KT 2016 092	Object name field misused	"pen in inkt"	"tekening"
KT 2020 022	Credit line names wrong organization	VriendenLoterij	BankGiro Loterij (merger creating VriendenLoterij occurred Aug 2021, after 2020 acquisition)
KT 2020 022	Date field contradicts itself	date inconsistency	Requires reconciliation
KT 2020 022	Sitter misidentified	"Abyssinian" implied	Identity requires verification against period sources
KT 2022 097	Related artist's first name wrong	"Johann Baldung Gruen"	"Hans Baldung Grien" — consistently misspelled in the catalog
KT 2022 097	Related artist's birth year wrong	1473	c. 1484/85 — error of ~11 years
KT 2022 190	Credit line may name wrong foundation	Don Quichote Foundation	La Tribune de l'Art reports Brook Foundation — requires verification
KT 2022 190	"fem.[?]" — question mark unwarranted	"fem. [?] Knip"	"fem." = standard French abbreviation for "femme" (wife); Christie's confirms without uncertainty
KT 2022 190	No provenance	absent	Christie's Paris, 22 Nov 2022, lot 1; hammer €80,000 (€100,800 with premium)

Object	Issue	Teylers says	Should be
KT 2022 190	No biographical context	bare name and dates	Gold medal Salon 1810; Premier Peintre to Marie-Louise; *Les Pigeons* (1808–1811)
KT 2022 190	No bibliography	absent	Temminck & Knip *Les Pigeons*; RKD entry
L 022	Gray wash missing from technique	"pen in bruin, penseel in bruin"	+ grijs (gray wash) — confirmed by 2011 Louvre/Teylers exhibition catalog
L 022	Verso technique absent	iconographic description only	Graphite, pen and brown ink, brown wash
L 022	2011 Louvre/Teylers exhibition not cited	not cited	Cover image of Van Tuyll/Plomp 2011; shown Louvre and Teylers
L 022	Queen Christina absent from provenance	"Odescalchi erfgenamen, 1790" only	Full chain: Christina → Azzolino → Odescalchi → Lestevenon → Teylers
L 022	Depicted site not identified	"rotswand met grot"	Grotto of Neptune, Tivoli (now Parco Villa Gregoriana)
L 022	Roethlisberger MRD number absent	bibliography listed but no MRD number	Specific MRD entry required for every Claude Lorrain drawing
N 058	"Self-portrait" subject tag absent	no subject tag	The hand depicted is Goltzius's own right hand — seminal self-portrait
N 058	No description	absent	Goltzius drew his own hand to demonstrate virtuosity after recovering from a crippling hand injury
N 058	Paper dimension discrepancy	328 mm	External sources: 322 mm — requires measurement verification

Topstukken Phase 3: Major Errors (36)

Object	Issue	Teylers says	Should be
RDW T 019	Recipient name misspelled	"Eddy de Wilde"	"Edy de Wilde" (Eduard Leon Louis de Wilde, 1919–2005)
RDW T 019	No biographical context for creators	bare names and dates	Nouveau Réalisme founders; Tirs; Nanas; Le Cyclop

Object	Issue	Teylers says	Should be
RDW T 019	No context for recipient / donating foundation	bare credit line	Edy de Wilde = Stedelijk director 1963–1985; Reinhold collection donated 1998
RDW T 019	Nouveau Réalisme not mentioned	absent	Both artists were founding members (Tinguely 1960; Saint-Phalle 1961)
RDW T 019	Soisy/Le Cyclop absent	absent	Soisy-sur-Ecole = shared studio; Le Cyclop under construction 1970
RDW T 019	Stedelijk Museum connection absent	absent	Saint-Phalle 1967 Nanas; Tinguely 1961 Bewogen Beweging / 1962 Dylaby
RDW T 019	No bibliography	absent	Hultén 1992; Tinguely catalogs; Nouveau Réalisme primary sources
T 029	Artist birth year wrong	1697	1696 (confirmed by Niemeijer catalogue raisonné title and all authorities)
T 029	Date range factually impossible	circa 1717 – voor 1750	1742 (subject matter existed only from 1739; Niemeijer 890T)
T 029	Technique misclassified	penseel in waterverf	Gouache (opaque); support is blue paper
T 029	Verso inscription absent	not listed	“Vertooning van den Ambassadeur van Maroccen in den hout”
T 029	Niemeijer catalogue raisonné absent	1904 Scholten only	Niemeijer 1973, cat. no. 890T — standard reference for all Troost works
T 029	No provenance in database	absent	Acquired 1780 for 100 guilders; pre-1780 unknown
O 007	Object name field misused	“penseel in waterverf”	“tekening” — recurring structural error
O 007	Pen medium almost certainly wrong	“pen in zwart”	Brown or grey (iron-gall ink); “zwart” anomalous across entire Avercamp corpus
O 007	Date lower bound unjustified	“ca 1605”	Avercamp in training in 1605; earliest paintings c.1608–1609; comparanda c.1615–1630

Object	Issue	Teylers says	Should be
O 007	Welcker catalogue raisonné absent	Scholten 1904; Plomp 1997	Welcker 1933/1979 — standard reference for all Avercamp works
O 007	No provenance	absent	Price inscriptions suggest 3-stage sales history; not researched
O 007	No art-historical significance	absent	Preeminent Dutch winter landscape master; Little Ice Age documentation
O 047	Title missing Gethsemane	"Christus en de discipelen"	"Christus en de discipelen in het Hof van Gethsemane" — location strips the subject
O 047	Benesch 89 absent from bibliography	not cited	Benesch 1973, no. 89 — universal scholarly identifier for Rembrandt drawings
O 047	No provenance in database	absent	Acquired at auction 1796 for 60 guilders; pre-1796 unknown
O 047	No exhibition history	absent	Louvre/Philadelphia/Detroit 2011; Teylers 2013
O 047	No description	absent	Ten disciples in circle; sleeping figures; excised strip; significance
P 078	Death year wrong	1684	1685 (died 27 April 1685, buried 2 May 1685, St. Bavo's Haarlem)
P 078	Irrelevant bibliography entry	"aquarel: Nederlandse meesters 19e eeuw"	Database linking error — 2015 exhibition of 19th-century watercolors; must be removed
P 078	Schnackenburg catalogue raisonné absent	not cited	Schnackenburg, *Zeichnungen und Aquarelle*, 2 vols., Hamburg 1981
P 078	No provenance	absent	Unknown; acquisition date and source not documented
T 085	Father's nationality wrong	"de Duitse graveur-uitgever"	Swiss — Matthäus Merian the Elder born Basel; consistently identified as Swiss
T 085	Creator role reductive	tekenaar only	Naturalist, entomologist, scientific illustrator, printmaker, painter

Object	Issue	Teylers says	Should be
T 085	"First time insects in all life stages" wrong	"voor het eerst" in *Metamorphosis* (1705)	Merian achieved this in *Der Raupen wunderbare Verwandlung* (1679), 26 years earlier
1355	D'Alembert listed as co-editor 1751–1780	both editors for full run	D'Alembert resigned 1758 after vol. VII; Diderot sole editor from 1758
1355	Neuchâtel false imprint absent	"Parijs, Amsterdam" only	Vols. 8–17 bear false "A Neufchâtel" imprint to evade 1759 censorship
1355	No provenance	absent	Acquired 1780 — four years before museum opening; documented in Teylers' own exhibition text
1355	No set description	absent	35 folio volumes: 17 text + 11 plates + 4 suppl. text + 1 suppl. plates + 2 table volumes
1355	No censorship history	absent	1759 Parlement condemnation; Index Librorum Prohibitorum; completed in secret; Le Breton's censoring

Conclusion

The analysis of 57 objects from across Teylers Museum's collections — 35 randomly selected and 22 from the museum's own curated Topstukken list — reveals a **consistent pattern of quality problems** in the online catalog. With approximately 146 major errors across 57 objects and not a single error-free record, the evidence strongly suggests that these problems are systemic. The extended Topstukken analysis (averaging more than 4 major errors per object) confirms that the museum's most important objects are, if anything, *less* well cataloged than the rest of the collection — likely because their greater historical complexity creates more opportunities for omission. A Rembrandt whose title strips the subject's location, a Dürer engraving with dimensions listed in the wrong order, an Encyclopédie with no provenance despite its acquisition predating the museum's own opening, and a Maria Sibylla Merian watercolor where the father's nationality is wrong — these are not minor oversights in a heritage collection of this stature.

The methodology demonstrated here — AI-assisted cross-referencing of catalog records against scholarly databases, museum collections, and reference works — is fast, scalable, and cost-effective. At approximately **€4 per object**, a full collection scan is economically feasible and would yield dramatic improvements in catalog quality.

Teylers Museum holds one of the most important heritage collections in the world. Its online catalog should reflect that distinction. The findings in this report are offered as a constructive contribution toward that goal — and as a demonstration that the tools to achieve it are ready today.

This report was produced by Duinroos Innovatie using AI-assisted research (Claude Opus 4.6, Anthropic). All findings are based on publicly available sources and cross-references with other museum collections. Individual analysis reports for all 35 objects are available at https://github.com/jsoeterbroek/teylers_collection_research.
